This document gives the proposed maximum residue limit (PMRL) for Quadris Flowable Fungicide and Quilt Fungicide, containing technical grade azoxystrobin, as provided by the Pest Management Regulatory Agency (PMRA). These limits are in conjunction with new use on groundcherries. Before registering a pesticide for food use in Canada, the PMRA must determine the quantity of residues that are likely to remain in or on the food when the pesticide is used according to label directions and that such residues will not be a concern to human health. The evaluation of this azoxystrobin application indicated that the end-use product has merit and value and that the human health and environmental risks associated with the new use are acceptable. Table 1 gives the proposed MRLs for azoxystrobin, and table 2 is the comparison of Canadian MRLs, American tolerance and Codex MRLs.--Includes text from document.

**PUBLIC RELATIONS WRITING: FORM AND STYLE** combines the practical approach of a trade book with the fundamental principles and theories of Public Relations to provide you with the essential techniques and methods needed to write with understanding and purpose. The writing principles section, which covers both style and techniques, is followed by Public Relations writing assignments that you'll likely have to do in your early jobs: emails, memos, letters, reports and proposals, backgrounders and position papers. Writing for mass media and the more complex public relations writing functions, including media kits, media pitches, print and online newsletters, brochures, magazines, including those online, and annual reports are also covered in this comprehensive guide.

The British Red Cross (BRC) has played a pivotal role in the history of war, international relations, humanitarianism and health in modern Britain, and interest in the charity has been piqued by the centenary of the First World War. Exhibitions, television series and the film Testament of Youth (2014) have highlighted the work of Red Cross volunteers. The History of the British Red Cross, 1870-2020 tells the broader story of the BRC within politics and society. Major episodes in modern British political and military history are integral to the story of the BRC, from the second wave of European colonialism and the South African War, to the two World Wars. Following the Second World War, the BRC provided vital support for the new National Health Service, organised civil defence activities during the Cold War, and responded to the suffering resulting from the actions of terrorists from the IRA to Al-Qaida. As Britain's representative to the International Committee of the Red Cross (ICRC), and the International Federation of Red Cross and Red Crescent Societies, the charity plays a key role in international relations and disaster relief. The 150th anniversary of the establishment of the National Society for Aid to the Sick and Wounded in War, founded in 1870 as the United Kingdom's member of the ICRC, provides a ripe opportunity for the publication of the first fully-contextualised account of the history of the BRC.
