Early products. Apple's first printer release was the Apple Silentype, released in June 1979, shortly after the Apple II Plus. The Silentype was a thermal printer, which used a special paper and provided 80 column output. Also compatible with the Apple III, the Silentype was a rebranded Trendcom 200. The Apple Dot Matrix Printer (often shortened to Apple DMP) is a printer manufactured by C ...

The printer came with a small built-in 2K RAM memory buffer, with option to expand. The second ImageWriter II (1986) changed to the standard warm-grey Apple "Platinum" color. This model is not only recognizable for being light grey in color, but for having the product name printed beside the rainbow Apple logo.

I'm printing from Safari. When I do Command + P, the print dialogue comes up. The small preview there is in color. But I see now way to adjust for color or black/white printing. I do have enough color toner supply. My Windows computer prints color without any issues. Any ideas how I can access some color printing setting?

From the incomparable New York Times and New Yorker illustrator Tamara Shopsin, a debut novel about a NYC printer repair technician who comes of age alongside the Apple computer—featuring original artistic designs by the author. NAMED A MOST ANTICIPATED BOOK OF 2021 BY LIT HUB. LaserWriter II is a coming-of-age tale set in the legendary 90s indie NYC Mac repair shop TekServe—a voyage back in time to when the internet was new, when New York City was gritty, and when Apple made off-beat computers for weirdos. Our guide is Claire, a 19-year-old who barely speaks to her bohemian co-workers, but knows when it's time to snap on an antistatic bracelet. Tamara Shopsin brings us a classically New York novel that couldn't feel more timely. Interweaving the history of digital technology with a tale both touchingly human and delightfully technical, Shopsin brings an idiosyncratic cast of characters to life with a light touch, a sharp eye, and an unmistakable voice. Filled with pixelated philosophy and lots of printers, LaserWriter II is, at its heart, a parable about an apple.

In many industrial companies, strategic developments are predominantly based on corporate marketing decisions with manufacturing being forced to react to these at the back end of process. In Manufacturing Operations Strategy, Hill demonstrates how decisions over manufacturing should form part of the strategic direction of the company as a whole. Written by the leading international figure in the field of
