Chapters are written by experts in their field and are designed to provide high-yield information pertaining to procedure indications, contraindications, pertinent anatomy, techniques, post-operative management, complications and key points. Each chapter concludes with a detailed photographic case report illustrating pertinent procedure specifics such as locations for incisions, anatomical planes of dissection, key steps in the procedure, radiographs findings and pre- and postoperative photographs. Procedures are organized by sections to include: dentoalveolar and implant surgery, odontogenic head and neck infections, maxillofacial trauma surgery, orthognathic and craniofacial surgery, tempomandibular joint surgery, infections of the head and neck, facial cosmetic surgery, and pathology and
