Discusses the use of leveled texts in kindergarten through eighth-grade classrooms, examines the "text base" needed for effective language literacy instruction, provides guidelines for creating a high-quality leveled book collection and matching books to readers, and explains how to analyze and level books.

The Business Administration Scale for Family Child Care (BAS) is the first valid and reliable tool for measuring and improving the overall quality of business and professional practices in family child care settings. It is applicable for multiple uses, including program self-improvement, technical assistance and monitoring, training, research and evaluation, and public awareness. It is currently embedded in many state quality rating and improvement systems (QRIS) across the nation. Using a 7-point rating scale (inadequate to excellent), this easy-to-use instrument assesses 10 items: Qualifications and Professional Development Income and Benefits Work Environment Fiscal Management Recordkeeping Provider-Family Communication Family Support and Engagement Marketing and Community Relations Provider as Employer The second edition of the BAS includes refinements to support the reliable use of the instrument and to reflect current best practices in administering a family child care program: The Notes for the BAS items are expanded to increase understanding and facilitate greater consistency in both interpretation and scoring. There is greater emphasis on practices that promote family and community engagement. New national norms for the BAS are reported based on data collected between 2009 and 2017 from 439 home-based programs in 22 states. Use the BAS second edition with the Family Child Care Environment Rating Scale (FCCERS-3 or FCCERS-R) for a comprehensive picture of your family child care learning environment and the business and professional practices that support the program.

This report presents the new excavations at Combe-Capelle Bas, a Middle Paleolithic site in southern France. The site is situated directly on a source of good quality flint, and recent theories suggest that such a setting may have certain predictable effects on the lithic industries. These effects, and others relating to current models of raw material procurement and use, are discussed. This book will appeal to anyone interested in Paleolithic archaeology, lithic analysis, raw material use, and site formation and taphonomy. University Museum Monograph, 91

Mastering Tax, BAS & Payroll is the all-new reincarnation of what was formerly Vinton's Office Tax Procedures. This new text has been extensively updated to align it with the current units of the relevant qualifications. The new author, Bhupendra Sethia, is supported by three contributing authors, Paul Panebianco (Chisholm TAFE, VIC), Upasana Mahajan (Glenvale Education, VIC), and Susan Loane (formerly Open Colleges, NSW). The result is an entirely revised and up-to-date textbook that will fully support students undertaking Certificate IV in Bookkeeping and Certificate IV in Accounting. The text has been technically reviewed to ensure its currency, accuracy and adherence to the FNS Training Package.

Thirty years after Bas Jan Ader failed to return from a solo crossing of the Atlantic, the interest in his work continues to grow. In less than ten years he created some thirty-five works of art in which falling, physical and emotional vulnerability and mortality are the central themes. Published to coincide with a retrospective exhibition, this thoroughly illustrated catalogue provides a much needed overview of these and other aspects of Ader's work. Also includes contributions by Tacita Dean, J rg Heiser and Erik Beenker, amongst others.
