Deborah Heiligman has conceived a delightfully refreshing approach. From letters and diaries, she has constructed a highly readable story of the marriage of Charles Darwin and his wife Emma, paced by the birth of their 10 children, running in parallel with the timeline of events in Charles' day job as a leading scientist of the mid 19th century.

Charles Darwin published *The Origin of Species*, his revolutionary tract on evolution and the fundamental ideas involved, in 1859.

Nearly 150 years later, the theory of evolution continues to create tension between the scientific and religious communities. Challenges about teaching the theory of evolution in schools occur annually all over the country. This same debate raged within Darwin himself, and played an important part in his marriage: his wife, Emma, was quite religious, and her faith gave Charles a lot to think about as he worked on a theory that continues to spark intense debates.

Deborah Heiligman's new biography of Charles Darwin is a thought-provoking account of the man behind evolutionary theory: how his personal life affected his work and vice versa. The end result is an engaging exploration of history, science, and religion for young readers. *Charles and Emma* is a 2009 National Book Award Finalist for Young People's Literature.

he returned from his extraordinary voyage on the Beagle. Their life together was intellectually exciting though overshadowed by personal tragedy. Edna Healey has discovered new, and hitherto unpublished material and has the full support of the Darwin family in writing this major biography.

A fresh account of Charles Darwin ' s rich personal and professional lives, well beyond *On the Origin of Species*. In 1859 Charles Darwin published *On the Origin of Species*. With this bedrock of biology books, Darwin carved a new origin-story for all life: evolution rather than creation. But this single book is not the whole story. In this new biography, J. David Archibald describes and analyzes Darwin ' s prodigious body of work and complex relationships with colleagues, as well as his equally productive home life—he lived with his wife and seven surviving children in the bustling environs of Down House, south of London. There, among his family and friends, Darwin continued to experiment and write many more books on orchids, sex, emotions, and earthworms until his death in 1882, when he was honored with burial at Westminster Abbey. This is a fresh, up-to-date account of the life and work of a most remarkable man.
