Products - cPanel
cPanel is a web hosting control panel (software that facilitates the management of a web hosting server) developed by cPanel, L.L.C., an American corporation. The software provides a graphical interface (GUI) and automation tools designed to simplify the process of hosting a web site to the website owner or the "end user". cPanel is part of a software suite called cPanel & WHM which provides ...

cPanel - Wikipedia
cPanel is a popular control dashboard that helps you manage your web hosting server using a human-friendly web-based interface. It's especially popular with shared hosts, where it's the de facto solution provided by most affordable hosting providers. Without cPanel, you would need technical knowledge to manage your websites/server.

Spam Threshold score. If the system calculates a spam score for a message that meets or exceeds the Spam Threshold Score setting, the system marks the message as spam. A lower spam threshold score, such as a one, is aggressive and labels many messages as spam, including messages that may not be spam. However, a higher value, such as a ten, is passive and only labels messages that are obviously ...
