FireEye Documentation Portal

FireEye NX Network Security helps you detect and block attacks from the web. It protects the entire spectrum of attacks from relatively unsophisticated drive-by malware to highly targeted zero-day exploits. Its capabilities provide an extremely low false positive rate by leveraging the FireEye Multi-Vector Virtual Execution (MVX) engine to confirm when malware calls out to C&C servers.

FireEye NX | InsightIDR Documentation

The FireEye NX Module enables ForeScout CounterACT and FireEye NX to work together to quickly detect advanced threats and indicators of compromise (IOCs), contain infected endpoints, and disrupt the cyber kill chain preventing further lateral threat propagation and data exfiltration.
