China's foreign policy apparatus, he notes, has been incoherent over the years since the establishment of the People's Republic. Its strategies have constantly vacillated between assertiveness, sometimes violent, and efforts to win the confidence of other nations—especially those of East Asia, as well as the United States.

International relations Xi and Putin slam 'foreign interference' with eye on Biden. China and Russia wary of a US administration vocal on human rights, democracy

From its founding 65 years ago, the People's Republic of China has evolved from an important yet chaotic and impoverished state whose power was more latent than real into a great power on the cusp of possessing the largest economy in the world. Its path from the 1949 revolution to the present has been filled with twists and turns, including internal upheavals, a dramatic break with the Soviet Union, the 1989 revolution wave, and various wars and quasi-wars against India, the USSR, Vietnam, and South Korea. Throughout it all, international pressures have been omnipresent, forcing the regime to periodically shift course. In short, the evolution of the PROC in world politics is an epic story and one of the most important developments in modern world history. Yet to date, there has been no authoritative history of China's foreign relations. John Garver's monumental *China's Quest* not only addresses this gap; it will almost certainly serve as the definitive work on the topic for years to come. Garver, one of the world's leading scholars of Chinese foreign policy, covers a vast amount of ground and threads a core argument through the entirety of his account: domestic political concerns - regime survival in particular - have been the primary force driving the People's Republic's foreign policy agenda. The objective of communist regime survival, he argues, transcends the more rudimentary pursuit of national interests that realists focus on. Indeed, from 1949 onward, domestic politics has been integral to the PROC's foreign policy choices. Over the decades, the regime's decisions in the realm of international politics have been dictated concerns about internal stability. In the early days of the regime, Mao and other party leaders were concerned with surviving in the face of American aggression. Later, they came to see the post-Stalinist Soviet model as a threat to their revolutionary program and initiated a stunning break with Khrushchev regime. Finally, the collapse of other communist regimes in and after 1989 radically altered their relationships with capitalist powers, and again preserving regime stability in a world where communism has been largely abandoned became paramount. *China's Quest*, the result of over a decade of research, writing, and analysis, is both sweeping in breadth and encyclopedic in detail. Quite simply, it will be essential for any student or scholar with a strong interest in China's foreign policy.

The Asia Pacific region has become an increasingly important focus of attention in International Relations in the post-Cold War period and the evolution of Chinese foreign policy holds the key to future developments in this arena. The collapse of the USSR also highlights China's importance as a potential global super power. This timely text provides a broad-ranging assessment of China's foreign relations at global and regional level and in relation to its disputed territories under foreign control.

Exploring China's foreign relations in terms of five broad interrelated dimensions, rather than chronologically, this volume surveys Chinese foreign policy from 1949 to the present. It covers the historical influence on China's foreign relations; its relations with the superpowers; revolutionary China; its economic relations; and national security. For historians and political scientists.

The book presents the views of leading Chinese and American scholars working in the fields of Chinese foreign policy, national security and international political economy. It seeks to challenge the conventional wisdom about China's recent rise, contending it is a much more complex and contested trend than it has often been portrayed to be.

"September 22, 1947 is a special day in the international history of the Cold War. On this day, the world turned its attention to Europe where the US-Soviet confrontation to divide the world into two competing camps reached a turning point"--

Now in a fully updated edition, this cogent book examines the international relations of the PRC since its founding in 1949. Robert Sutter provides a balanced assessment of the country's recent successes and advances as well as the legacies and constraints that hamper it, especially in nearby Asia—long the focus of China's foreign policy attention.
