### Historical Dictionary of the Crusades (Historical ...

During the late eleventh through the early fourteenth centuries, at least seven major expeditions were made between Western Europe and the Holy Land with the goal of ending Muslim control of Jerusalem. Ultimately the crusaders were driven out, but not before a cultural exchange had taken place that had an immense impact on Western Europe and an equally enormous, albeit less positive, impact on ...

[Historical Dictionaries of War, Revolution, and Civil Unrest, No. 25.] (Lanham, Maryland, and Oxford: The Scarecrow Press. 2003. Pp. xxiv, 273. \$65.00.) This volume joins a crowded field of new reference books on the crusades, most notably Alfred J. Andrea's excellent Encyclopedia of the Crusades (Greenwood, 2003) and the multi-volume Encyclopedia of the Crusades edited by Alan Murray and forthcoming from ABC-Clío.

At least seven traditional crusades, aimed at wresting control of Jerusalem from Islam, were fought in the Middle Ages. This historical dictionary covers major events in these and related conflicts, with supporting bibliography, maps, and chronology.

The second edition of Historical Dictionary of the Crusades is an accessible one-volume overview of the medieval crusades to the Middle East between 1095 and 1291, with substantial information on crusades in southern France, Italy, Spain, and the Baltics that take the timeline into the 14th century.

The Ismaili Muslims, who belong to the Shia branch of Islam, live in over 25 different countries around the world, mainly in Asia, Africa and the Middle East. Their history has typically been linked to the history of the various countries in which they live, but the worldwide community is united under Prince Karim Aga Khan, the spiritual leader and 49th Imam of the Ismaili Muslims. Few fields of Islamic studies have witnessed as drastic a change as Ismaili studies, due in part to the recent discovery of numerous historical texts, and author Farhad Daftary makes extensive use of these new sources in the Historical Dictionary of the Ismailis. This comprehensive new reference work is the first of its kind on the Ismailis and presents a summary of the findings of modern scholarship on the Ismaili Shia Muslims and different facets of their heritage. The dictionary covers all phases of Ismaili history as well as the main doctrines of the community. It includes an introductory chapter, which provides a broad historical survey of the Ismailis, followed by alphabetical entries on all major aspects of the community, such as key figures, institutions, traditions, and doctrines. It also contains a chronology, genealogical tables, a glossary, and a substantial bibliography. This book is an excellent access point for students, researchers, and anyone wanting to know more about the Ismailis."

'Wonderfully written and characteristically brilliant' Peter Frankopan, author of The Silk Roads 'Elegant, readable ... an impressive synthesis ... Not many historians could have done it' - Jonathan Sumption, Spectator 'Tyerman's book is fascinating not just for what it has to tell us about the Crusades, but for the mirror it holds up to today's religious extremism' - Tom Holland, Spectator Thousands left their homelands in the Middle Ages to fight wars abroad. But how did the Crusades actually happen? From recruitment propaganda to raising money, ships to siege engines, medicine to the power of prayer, this vivid, surprising history shows holy war - and medieval society - in a new light.

Entries cover the important figures, events, legislation, crusades, and terms of the health reform movement of the years before the Progressive Era through the 1920s.

'A nuanced and sophisticated analysis... Exhilarating' Sunday Telegraph  
Nine hundred years ago, one of the most controversial episodes in Christian history was initiated. The Pope stated that, in spite of the apparently pacifist message of the New Testament, God actually wanted European knights to wage a fierce and bloody war against Islam and recapture Jerusalem. Thus was the First Crusade born. Focusing on the characters that drove this extraordinary campaign, this fascinating period of history is recreated through awe-inspiring and often barbaric tales of bold adventure while at the same time providing significant insights into early medieval society, morality and mentality. The First Crusade marked a watershed in relations between Islam and the West, a conflict that set these two world religions on a course towards deep-seated animosity and enduring enmity. The chilling reverberations of this earth-shattering clash still echo in the world today. '[Asbridge] balances persuasive analysis with a flair for conveying with dramatic power the crusaders' plight'  
Financial Times

An in-depth study of the Crusades provides a comprehensive history of the medieval wars over control of the Holy Land and the resultant clash and mingling of East and West

A handy reference that provides an introduction to the history of the strategic archipelago of Malta. The entries cover the political, economic, and social situation in the country since its independence from Britain in 1964. Invaluable to those in the scholarly professions, many laypersons, and even casual tourists.

In 1096 five great armies left Europe to answer the call from Pope Urban II to ride to the rescue of their fellow Christians in the East, and free the Holy City of Jerusalem from the 'infidels'. After gruelling marches, bitter infighting, desperate privation and brutal battles this first 'crusade' culminated in the triumphant capture of Jerusalem and the establishment of a Christian kingdom in Palestine and Syria that survived until 1291. The second crusade, begun in 1147 and the third, begun in 1189, were less successful but still full of the same fervour, high hopes and soaring ambition as the first. This book covers all three crusades in detail, following the journeys, events, battles and leaders of all three. The crusades were led by princes and kings who became involved for the good of their souls or earthly reputations, but they were dependent on the knights and entourages who fought for precedence and wealth almost as fiercely as they fought the enemy, and all were bolstered by the visionaries and priests who inspired devotion and sacrifice. These different players and their stories are all explored, as well as special sections on the fortresses they erected and the kingdoms they established. Historians argue over the character and legacy of the crusades, but what is certain is that they hold an enduring fascination for modern readers. The crusaders' enterprise retains a heroic element, a seemingly impossible objective entered into with enormous faith, self-belief and courage. However, if the crusades did have a noble and even heroic side, they also cast a deeply troubling shadow across the ages, and studying the causes and events of these medieval wars of faith remains highly relevant. This book discusses all aspects of these turbulent times, and evokes the colourful spirit of the period in over 300 illustrations.

Presents an encyclopedia of the Crusades, including entries for Islamic and European topics, biographical portraits, extracts from primary sources, and a time line.
