This book covers the typical material of an intermediate macroeconomics course at the undergraduate level. The approach is both theoretical and statistical, with the theory being limited to algebraic expressions and the statistics to simple and multiple regression and correlation. The coverage is traditional for the course (being IS-LM in its focus), and the tests are of the consumption function, investment function, demand for money, Phillips curve, etc. Every effort is made to explain the statistics, with

some explicit statistical material embedded in the text and several "how to" sections in the Appendix geared to the popular programs EViews and Excel. There is also a set of Internet links that instructors can readily access in order to supplement and update the data and to use to provide the data for the students to work the exercises. The book is intended as a text for an intermediate economics course and has been used as such at North Carolina State University. There are full sets of review questions, discussion questions, problems, and computer exercises attached to each chapter, all of which have been classroom-tested. In addition to undergraduates (especially advanced undergraduates), graduate instructors will benefit from

"The book focuses on the short- and long-term macroeconomic challenges faced by developing countries characterized by missing, incomplete and dualistic markets and weak institutions. Such problems affect long-term growth, short-term macroeconomic equilibrium, employment and inequality far more than in the advanced economies. A central message of the book is that ignoring these features and applying to developing countries models inspired by the reality of

advanced economies may lead to wrong conclusions and policies. These challenges are discussed for a number of archetypes of developing economies dependent on land and natural resources, affected by supply rigidities in agriculture, and featuring dualistic markets, a dominant informal sector, fast population growth, and chronic dependence on the export of commodities and a volatile external finance. Finally, the book discusses the impact on growth, inequality and poverty of the stabilization and structural adjustment reforms that were increasingly implemented during the last 30 years. These issues have acquired center stage after the launch of the Millennium Development Goals and Sustainable Development Goals initiatives that have
