Maternal And Child Health Global

The health of women and children is vital to creating a healthy world. Despite great progress, there are still too many mothers and children dying—mostly from causes that could have been prevented. Every day, approximately 800 women die from preventable causes related to pregnancy and childbirth. 99% of these deaths occur in developing countries.

CDC Global Health - Maternal and Child Health

Significant progress has been made in improving maternal and child health globally, in part due to increased U.S. leadership and support. Since 1990, the annual number of child and maternal deaths has been more than halved.

Maternal and Child Health - Global Health Briefing Book 2019

Maternal and child health (MCH) is the public health discipline which deals with the promotion and protection of the health of women, child, adolescents, and their families and communities. Today, a significant percentage of the activities undertaken by international development agencies and professionals remain focused on the protection and improvement of the health and wellbeing of women, children, and families.

Global Maternal and Child Health: Medical, Anthropological ...

Maternal, Newborn and Child Health The World Health Organisation estimates that 800 women die every day due to complications in pregnancy or childbirth, 99% of these deaths occurring in low-income countries. The most common causes of maternal mortality are obstetric haemorrhage, sepsis and pregnancy associated hypertension.

Maternal, Newborn and Child Health | King's Global Health ...

Despite global progress, huge inequities remain in maternal, newborn, and child health. The world already possesses the evidence-based interventions we need to close the gaps in health outcomes—oxytocin for postpartum hemorrhage, 7.1% chlorhexidine for umbilical cord care, kangaroo mother care for small infants (pictured), amoxicillin dispersible tablets for childhood pneumonia, and more.

Mapping the road to equity in maternal, newborn, and child ...

This initiative supports the global efforts to ensure that all women and children, regardless of where they live or are born, have access to quality health care services. Share Despite remarkable global progress, the most essential maternal and reproductive health interventions still do not reach the poorest and most vulnerable women, girls and children in the developing world.

Maternal, Child and Reproductive Health - ISGLOBAL

Maternal and reproductive health. Maternal mortality: Every day in 2017, about 808 women died due to complications of pregnancy and child birth. Almost all of these deaths occurred in low-resource settings, and most could have been prevented. The primary causes of death are haemorrhage, hypertension, infections, and indirect causes, mostly due to interaction between pre-existing medical conditions and pregnancy.

WHO | Maternal and reproductive health

More women and their children are surviving today than ever before, according to new child and maternal mortality estimates released today by United Nations groups led by WHO and UNICEF. Still, the new estimates reveal that 6.2 million children under 15 years died in 2018, and over 290 000 women died due

to complications during pregnancy and childbirth in 2017.

WHO | Data for maternal, newborn, child and adolescent health

With 210 million women becoming pregnant and the delivery of 140 million newborn babies each year, it is urgent to improve the quality of care and reduce disparities in access, thereby securing future economic and social development and supporting the vision of the 2030 Sustainable Development Goals (SDGs) and the Global Strategy for Women's, Children's, and Adolescents' Health.

The Lancet Maternal Health Series: Global Research ...

Maternal health is closely linked to newborn survival, as vulnerabilities to illness can pass from mother to child. While great strides have been made in reducing global under-five child mortality, newborns now account for 46 percent of all childhood deaths.

Maternal, Newborn & Child Health - Bill & Melinda Gates ...

Maternal and newborn health UNICEF and partners help save the lives of mothers, newborns and children by supporting high-quality, low-cost care and services before, during and after birth - at health facilities and at home. We also work towards the final elimination of maternal and newborn tetanus across the globe.

Maternal, newborn and child survival | UNICEF

USAID is a global leader in maternal and child health, and partners with governments to meet the health needs of their women and children. USAID's Acting on the Call reports present a roadmap with country-specific plans and updates on progress to address these needs.
