The MSTest test runner contains the program entry point to run your tests. dotnet test starts the test runner using the unit test project you've created. Your test fails. You haven't created the implementation yet. Make this test pass by writing the simplest code in the PrimeService class that works:

*Unit testing C# with MSTest and .NET Core - .NET Core ...*

A unit test should not take a disproportionately long time to write compared to the code being tested. If you find testing the code taking a large amount of time compared to writing the code, consider a design that is more testable. Code coverage. A high code coverage percentage is often associated with a higher quality of code. However, the measurement itself cannot determine the quality of ...
