The possibility that Iran will acquire a nuclear weapons capability poses a significant threat to the stability of the Middle East and a potential challenge to the long-term viability of the nuclear non-proliferation regime. Since 2003, diplomatic efforts by the EU-3 (United Kingdom, France and Germany) have succeeded in suspending the sensitive aspects of Iran's nuclear programme, but prospects for reaching a permanent agreement with the Iranian government are uncertain. If the EU-3 effort collapses, a number of policy options will be given more serious consideration, including sanctions, containment, regime change and military action. This IISS Strategic Dossier on Iran's strategic weapons programmes provides an objective technical assessment of Iran's nuclear, chemical, and biological weapons capabilities, as well as its ballistic missile programme. The dossier evaluates what is known and what is not known about these capabilities and projects potential future developments. In addition, the dossier provides a history of democratic efforts over the last three decades, to prevent Iran from acquiring a nuclear weapons capability and examines different options for current diplomatic efforts. Each chapter has been written and reviewed by recognised international experts in their respective fields. The IISS does not advocate any particular policy option for dealing with the Iranian nuclear issue. The objective of Iran's Strategic Weapons Programmes: A Net Assessment is to assess, as accurately and dispassionately as possible, Iran's capabilities and evaluate the pros and cons of different policy options in the order to foster a well-informed policy debate.

You've just boarded a plane. You've loaded your phone with your favorite podcasts, but before you can pop in your earbuds, disaster strikes: The guy in the next seat starts telling you all about something crazy that happened to him—in great detail. This is the unwelcome storyteller, trying to convince a reluctant audience to care about his story. We all hate that guy, right? But when you tell a story (any kind of story: a novel, a memoir, a screenplay, a stage play, a comic, or even a cover letter), you become the unwelcome storyteller. So how can you write a story that audiences will embrace? The answer is simple: Remember what it feels like to be that jaded audience. Tell the story that would win you over, even if you didn't want to hear it. The Secrets of Story provides comprehensive, audience-focused strategies for becoming a master storyteller. Armed with the Ultimate Story Checklist, you can improve every aspect of your fiction writing with incisive questions like these: • Concept: Is the one-sentence description of your story uniquely appealing? • Character: Can your audience identify with your hero? • Structure and Plot: Is your story ruled by human nature? • Scene Work: Does each scene advance the plot and reveal character through emotional reactions? • Dialogue: Is your characters' dialogue infused with distinct personality traits and speech patterns based on their lives and backgrounds? • Tone: Are you subtly setting, resetting, and upsetting expectations? • Theme: Are you using multiple ironies throughout the story to create meaning? To succeed in the world of fiction and film, you have to work on every aspect of your craft and satisfy your audience. Do both—and so much more—with The Secrets of Story.

Concerns about CBRN (Chemical, Biological, Radioactive, Nuclear) weapons have featured prominently in both political debates and media reporting about the ongoing threat from al Qaeda since 9/11. This book provides a chronological account of al Qaeda's efforts to acquire a CBRN weapon capability, and the evolution of the al Qaeda leadership's approach to actually using CBRN weapons, set against the context of the politicisation of the threat of CBRN terrorism in US security debates. Ben Cole explores how the inherently political nature of terrorist CBRN threats has helped to shape al Qaeda's approach to CBRN weapons, and shows how the heightened political sensitivities surrounding the threat have enabled some governments to manipulate it in order to generate domestic and international support for controversial policies, particularly the 2003 invasion of Iraq. He assesses the relative success of the al Qaeda leadership's political approach to CBRN weapons, together with the relative success of efforts by the US, UK and Russian governments to exploit the al Qaeda CBRN threat for their wider political purposes. Shedding new light on al Qaeda's tactics and strategy, this book will be essential reading for scholars of terrorism and extremism studies.
